

STRENGTHENING URBAN POLICY IN THE EU

-Web Conference-

18 November 2021 | 10 am – 3:15 pm

Integrating the principles of the New Leipzig Charter into the Urban Agenda for the EU

STRENGTHENING URBAN POLICY IN THE EU

Integrating the principles of the New Leipzig Charter into the Urban Agenda for the EU

The New Leipzig Charter is the key reference document on principles of good urban governance in Europe. It is interlinked with the Urban Agenda for the EU as a novel multi-level governance approach that aims to strengthen the “urban dimension” of EU policies. With the first generation of partnerships of the Urban Agenda for the EU coming to an end the process of paving the way for an even stronger Urban Agenda has been initiated and advanced under the Trio Presidency of Germany, Portugal and Slovenia. This process will conclude with the adoption of the Ljubljana Agreement at the Informal Ministerial on Urban Development on 26 November 2021.

The conference therefore, raises the question, how the continuation of the Urban Agenda for the EU can contribute to the implementation and principles of the New Leipzig Charter and vice versa and how to bring an urban dimension into EU-policies in particular in the ongoing implementation of the “Green Deal”?

The event is aimed at the stakeholders of the European “urban development community” with a strong interest in the EU “urban dimension”. The session will conclude the comprehensive series of seven public web conferences “Cities Fit for Future” on the implementation of the New Leipzig Charter, which started in September 2020. It is organised by the German Association for Housing, Urban and Spatial Development and funded by the German Federal Ministry of the Interior, Building and Community in the context of the National Urban Development Policy.

Please register for the event here: https://eveeno.com/fit-for-future_europe

The conference is going to be streamed via YouTube. All registered participants will receive the access data via e-mail.

Setting of the web-series

The “New Leipzig Charter: The transformative power of cities for the common good” was adopted on 30 November 2020 under the German EU Council Presidency. Against this background, the German Association for Housing, Urban and Spatial Development (DV) – which also was intensely involved in the development of the new charter – in September 2020 launched the web series “Europe’s Cities Fit for Future”. The series is supported by the German Federal Ministry of the Interior, Building and Community in the context of the National Urban Development Policy. Further partners are URBACT, Eurotowns and Metrex. The three web conferences in 2020 addressed a broad international audience of experts and had 800 participants in total. The sessions transmitted the key principles of the New Leipzig Charter and combined the practical perspective of municipalities with the political discourse. In 2021, the series was continued. The first three sessions put their focus on the national urban development policy in Germany. The upcoming last event, “Strengthening the Urban Dimension in EU policies”, aims at completing the series and will reflect the topic once again at European level.

AGENDA

Moderation: **Jonas Scholze**, Executive Director, German Association for Housing, Urban and Spatial Development

Welcome and Opening

10:00 **Anne Katrin Bohle**, State Secretary at the Federal Ministry of the Interior, Building and Community, Berlin
